

- All lighting will be replaced with LED bulbs and existing signage will be updated and refreshed where needed.
- We'll also repair and replace guard rails and fencing where required.
- We will also install a defibrillator.
- The existing building will be refurbished and refreshed with new notice boards and screens, improved facilities and more. We'd like your thoughts on how we can make the building better.

When will it happen?

We aim to complete the improvements during 2025, with no major interruption to bus services during the works.

on our proposals
to improve...**

Monks Cross Park and Ride

Have your say:

York's buses are benefitting from £17.3m of government funding. We're using this money to deliver a range of improvements, from bus priority measures to new shelters, seating and lighting. We now want your views on our proposals to improve the Park and Ride sites, including Monks Cross.

- Our proposals for Monks Cross include converting a number of EV charging spaces into Blue Badge holder only EV bays.
- We'll also offer new accessible cycle parking and a cycle repair stand.
- We'll replace and upgrade the cycle lockers and introduce micro-mobility / e-scooter parking.
- We will also repair and replace some of the block paving along pathways, and replace kerbs with drop kerbs to improve accessibility.

- | | | | |
|---|--|--|---|
|  Building upgrades |  E-scooter parking |  Covered and accessible cycle parking |  Hyper hub |
|  New upgraded cycle lockers |  Parking |  EV charging | |
|  Improved accessible car parking |  New accessible EV charging |  Doctor Bike | |
